As a classical liberal and an entrepreneur who has been building PRESS GLASS continuously for more than 30 years, I know how important freedom is. I have long supported various freedom initiatives and think tanks, however, I have found it worth doing even more in this area. For this reason I decided to create the Economic Freedom Foundation.

A well-functioning economy is not built solely through business ventures. One should also support certain values and ways of thinking about the economy and politics. I am convinced that economic freedom, the rule of law, and an open society are key to development, improving people's living standards and peaceful cooperation.

I am committed to building a strong position for Poland in the European Union and the adoption of the euro in our country, which is why, over the past months, the Foundation has initiated a nationwide campaign "Road to euro".

Economic freedom, which is the subject of numerous attacks, will not defend itself. The goal of the Economic Freedom Foundation is to actively engage in the promotion and strengthening of liberal thought in Poland, which I also encourage you to do.

WHAT WE DO

The Foundation supports projects in four focus areas:

ECONOMIC FREEDOM

Economic freedom is of fundamental importance for the development and creates favorable conditions for work, entrepreneurship and one's own choices of life paths.

EDUCATION FOR THE FUTURE

We support modern education that focuses on the competencies of the future and responds to the real needs of the population.

POLAND IN THE EU AND THE EUROZONE

We strive for a strong position of Poland in the European Union, in which the pillars are the common market and the protection of fundamental rights and freedoms. By leading the "Road to euro" campaign, we support the idea of Poland joining the Eurozone.

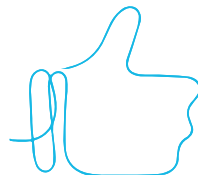

RULE OF LAW

The institutions of the rule of law guarantee individual freedoms, protect our fundamental rights, as well as safeguard individuals from the oppression of authority.

CALL TO ACTION!

Do you want to support non-governmental groups? Are you looking for organizations, whose development is worth investing in? Do you have ideas on how to strengthen freedom and the rule of law?

HOW WE WORK

Our mission is to invest in the most valuable initiatives for economic freedom and to create space for cooperation and integration of free market supporters.

GRANTS

We invest in projects that support economic freedom, and we strengthen the power of their impact. To date, we have funded more than 50 initiatives.

LIBRARY OF LIBERTY

We are building a unique book collection containing the most important items concerning freedom, including economic freedom, and liberal thought as a whole. We have already accumulated more than 3,000 books.

PUBLICATIONS AND MEDIA

We support the creation of valuable content that reinforces liberal ideas in the public debate, and our representatives are active in the media.

POLISH ROAD TO EURO

The aim of the KursNaEuro.pl campaign is to start a debate on the accession of Poland to the Eurozone and to inform about the benefits associated with it.

EDUCATION

We support educational projects. We are open to cooperation with students, researchers, universities, and think tanks. We cooperate, among others, with the Civil Development Forum (FOR), the Warsaw School of Economics (SGH), and Campus Poland of the Future.

EVENTS

The Foundation organizes panels, debates and events on important economic issues, as well as creates a space for collaboration among people who share our values.
